

DATA CENTRE CONSTRUCTION

HARLOW, ESSEX

Building on our client's vision of innovation and technology, JCA designed and built a leading data centre facility which is certified as BREEAM excellent, offering an innovative solution for hosted data services. The facility offers flexible world class data capacity, which benefits from highly resilient power and diverse communications.

"The Kao Data Campus reaffirms the UK's position as a global business hub and we were proud to work with JCA on the design and construction of London One, which delivers market leading efficiency. Its technical infrastructure provides the highest standard of data resilience and operational sustainability."

Paul Finch, Chief Operating Officer, Kao Data
