

SCIENCE INCUBATOR FIT-OUT BRISTOL

With an objective of creating a collaborative environment for more than 100 scientists, engineers, academics and entrepreneurs, JCA was commissioned by N S Science to develop a 15,000sq ft industrial unit into 17 fully serviced laboratories and flexible office space, to an exceptionally high standard.

"We were delighted with the fit-out work by JCA, which marks the beginning of our journey. I'm really excited about scientists working together under one roof in one of the UK's most entrepreneurial cities."

Dr Harry Destecroix, Co-Founder, Unit DX
