

CAT A OFFICE FIT OUT LONDON

IHS Markit is a London-based global information provider. The company occupies three floors of a 20-storey multi-tenant building at Ropemaker Street. The building provides 571,000 sq ft of office accommodation with supplemental retail accommodation.

The project involved a CAT A fit out of the 3rd floor office area. Some of the works carried out on site included installation of high acoustic double glazed steel partitions, solid partitions creating new rooms and new power and data throughout. We completed high end joinery works, installed a tea point and printer stations as well as completed all new finishes throughout.
