

SERVICE FACILITY DESIGN & FIT OUT ROTHWELL

The project involved full design and fit out of a new secure commercial lorry park with refuelling, catering and overnight facilities. Key on this development was liaising with the local building control officers which JCA managed on the client's behalf.

JCA were engaged on a design and build basis to carry out interior fit out works incorporating new sleeping accommodation, shower block, toilet facilities including all associated public health, mechanical and electrical installations. The project was delivered on time, within budget and against strict quality standards.
